From university engineering students and competitive robotics teams to 8-year-olds showcasing their own inventions, Maker Daytona Beach is quickly becoming a new hub for hands-on creativity, STEM learning and grassroots innovation in Volusia County.

Connected to the global Maker Movement through Maker Faire Orlando, Maker Daytona Beach hosted its second community Maker Show N' Tell Night on Thursday, May 14. Unlike traditional exhibitions, Maker

Daytona Beach is a highly interactive community event where attendees are encouraged to ask questions, connect directly with creators, and experience projects up close.

The event attracted more than 120 attendees and brought together creators, students, educators, engineers, artists and families to build, learn and share ideas.

Current collaborators and supporters of the event include Volusia County Schools STEM, The Brown Museum at MOAS, Volusia County Economic Development, local libraries, educators, artists, and robotics teams throughout the region.

Additional Maker Show N' Tell Nights will be hosted on June 11 at the Daytona Beach Regional Library and July 16 at the Deltona Regional Library.

Organizers are working to establish Maker Daytona Beach as a nonprofit chapter.
